Claude

Hi Rohan,

We're glad to welcome Rohan's Individual Org to Claude for Startups. We built this program because some of the most ambitious work on Claude is coming from founders like you, and we want to support it early.

Claude for Startups gives you a direct line to the people who build Claude, early access to what we ship, and a community of founders working on similar problems. With Claude for Startups, you'll always build in good company.

Here's what comes with your spot in the program

Live sessions

Technical deep dives and working sessions you can join online, led by the team that builds Claude.

Startup events

Hackathons, Builder Days, Founder Days, and meetups. You'll get priority invites to what we host, plus a line into community-run events near you.

Founder resources

Practical, build-focused material from our team and from other founders. We'll send the best as it ships.

We'll leave you with this: Claude Code founder Boris Cherny on YC's Lightcone podcast, on the startup playbook that turned a two-person prototype into one of the fastest-growing dev tools.

We're excited to see what you build.

— the Claude for Startups team
